

Google Home Description

What is Google Home?

Google Home is a voice-activated speaker powered by Google Assistant. Ask it questions. Tell it to do things. It's your own Goggle, always ready to help.

Features

Here are some of the features that the team considered interesting and in close relation with the project.

Mobile app audio streaming:

Stream audio from your phone to Goggle Home from 100+ Chromecast-enabled audio apps or through phone mirroring.

News:

Get the latest news from sources you trust.

Radio and Podcast:

Listen to your favorite radio stations and podcasts.

TV Streaming and control:

Streaming video content to any TV that has Chromecast plugged in or built-in. Then play, pause, or turn up the volume.

Sports:

Ask for scores, live updates, or next game date, location, and time.

Translation:

Get translations for words or phrases in supported languages.

This concludes the Google Home description. For an even more detailed version please visit: <https://madeby.google.com/home/>. The information for this document was inspired from the website above.
