

# Intel Compute Stick Description

## What is the Intel Compute Stick?

The Intel Compute Stick is a tiny device the size of a pack of gum that can transform any HDMI\*TV or display into a complete computer. Available with a range of Intel processors, it's everything you love about a desktop computer in a device that fits in the palm of the hand.

Nearly every television, every spare computer monitor, or even projectors with HDMI inputs can now be transformed into an instant Windows 10 desktop computer.

The Compute Stick is must not be mistaken with for a high-end machine, in fact, they struggle to keep up the least-expensive clamshell laptops.

## Features

PC CPU	1.44GHz Intel Atom x5-Z8300
PC Memory	2048MB DDR3 SDRAM 1600MHz
